

# myCar™ Fact Sheet

UIE Automotive's myCar™ platform connects vehicles and mobile devices, enhancing the relationship of consumers with their vehicle, the dealer, and the manufacturer through real-time content and dynamic services.

## Platform

- Single turnkey code base
- Can be customized for each tier and model of vehicle
- Unifies three screens for the automobile (PC, Mobile, and in-vehicle displays)
- Uses existing in-vehicle telematics infrastructure
- Updates and new services are easily deployed
- Commands conveyed through server-based system using wireless Internet protocols

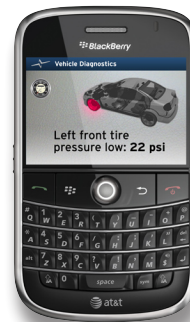

## Control

- Remote-control features of myCar™ include:
  - Door unlock/lock
  - Open windows
  - Open trunk
  - Start engine (runs for 5 minutes, or until ignition key is inserted)
  - Flash lights and sound horn
  - Reset alarm
  - Vehicle finder
    - Track and view current location(s) of the vehicle
    - Geo-fencing and Driver Alerts

## Owner and Vehicle Data

- Vehicle Diagnostics
  - Monitoring of key vehicle systems
  - Owner alerts and recommended steps
